

Big Data Pilot Demo Days: Track & Know

Fleet management services: Quality and predictions in location data from GPS devices

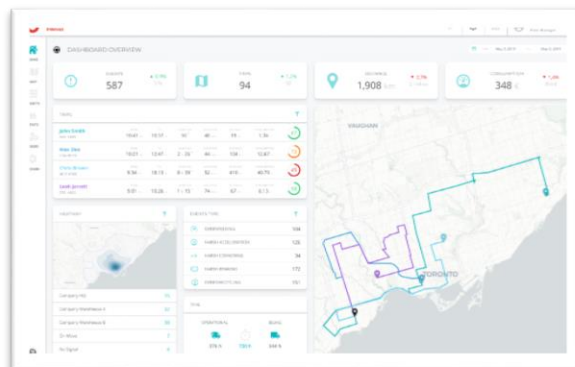

Biography

Athanasios Koumparos is a **senior software engineer** working on fleet management projects over a decade. Currently his main position is managing research projects at **Vodafone Innovus** and is interested in mobility in urban areas and big data analytics.

“Our mission is to select quality data and make valuable predictions in fleet management.”

Athanasios Koumparos

Track & Know is a **Horizon2020 project**, with a focus on Big Data. More specifically, Track & Know will research, develop and exploit **a new software framework that aims at increasing the efficiency of Big Data**. This will be applied in the transport, mobility, motor insurance and health sectors.
